The original 1992 Dodge Viper captured lightning in a bottle upon its debut. Combining ground-shaking V-10 American muscle and a refined chassis with true sports car handling, the Viper put America on the world's supercar map. In 2012, Dodge will unveil its new fifth-generation Viper, and this officially Dodge-licensed book will tell the whole story.

Offers advice on keeping snakes in captivity, including tips on purchasing, feeding, and health problems

The Haynes Manual on the Type 45 'Daring' is the first modern warship to be covered within manual form. It includes the story of the development, trials and entry into Royal Navy service of the Type 45, the anatomy of the Type 45, its propulsion system, radar command and control systems, weapons systems, and the captain and executive officer's views. The Type 45 'Daring' class is the largest and most powerful air defense destroyer class ever operated by the Royal Navy and the largest general purpose surface warship (excluding aircraft carriers and amphibious ships) to join the fleet since the Second World War cruisers. Author Jonathan Gates describes the development, trials and entry into Royal Navy service of the Type 45, the anatomy of the vessel, its propulsion system, radar command and control systems, weapons systems, and how the ship is operated at sea. The book is officially licensed with the Royal Navy.

The Astute-class is the largest, most advanced and most powerful attack submarine ever operated by the Royal Navy, combining world-leading sensors, design and weaponry in a versatile vessel. The submarines are nuclear-propelled and fuelled by a nuclear reactor powerful enough to supply a city the size of Southampton. Its advanced technology means the submarines will never need to be refuelled. They employ the latest technology such as the Sonar 2076 that detects the sound of enemy submarines using the largest number of hydrophones ever fitted to a submarine. Linked with powerful onboard electronics these provide the submarines with outstanding sensitivity. The Astute submarines are armed with the latest versions of Spearfish heavy-weight torpedoes and Tomahawk land-attack cruise missiles.

The automotive industry appears close to substantial change engendered by [self-driving](#) technologies. This technology offers the possibility of significant benefits to social welfare:saving lives; reducing crashes, congestion, fuel consumption, and pollution; increasing mobility for the disabled; and ultimately improving land use. This report is intended as a guide for state and federal policymakers on the many issues that this technology raises.

From the first motor cars and classic cars to today's supercars and Formula 1, this is the ultimate book about the history of the car. Packed with stunning photography, and featuring more than 2,000 cars, Car shows you how cars have evolved around the world over the the last 130 years, and their impact on society as objects of curiosity, symbols of status and luxury, and items of necessity. Extensive catalogues showcase the most important marques and models, organized in categories such as sports cars, convertibles, and city compacts. The book also features virtual photographic tours of some of the most iconic cars from each era such as the Rolls Royce Silver Ghost, Ford Model T, Lamborghini Countach, and Ferrari F40, while cross-sections of key engines explore the driving force behind them. Lavishly illustrated feature spreads detail the stories of the men, machines, and magic that helped create the car world's most famous marques and made brands such as Porsche, Mercedes-Benz, Aston Martin, and Cadillac household names. If you love cars, then you'll love Car. It is simply a must-have title for all car enthusiasts.

This practical guide contains seven modules targeted at district and health facility staff. It intends to meet the demands to improve immunization services so as to reach more infants in a sustainable way, building upon the experiences of polio eradication. It includes materials adapted from polio on planning, monitoring and use of data to improve the service, that can be used at any level. Revising the manual has been a team exercise. There are contributions from a large number of experts, organizations and institutions. This new edition has seven modules. Several new vaccines that have become more readily available and used in recent years have been added. Also the section on integration with other health interventions has been expanded as exciting opportunities and experiences have become evident in the years following the previous edition. Module 1: Target diseases and vaccines Module 2: The vaccine cold chain Module 3: Ensuring safe injections Module 4: Microplanning for reaching every community Module 5: Managing an immunization session Module 6: Monitoring and surveillance Module 7: Partnering with communities.

This series of comprehensive manuals gives the home mechanic an in-depth look at specific areas of auto repair.

Looks at the operations of the International Space Station from the perspective of the Houston flight control team, under the leadership of NASA's flight directors, who authored the book. The book provides insight into the vast amount of time and energy that these teams devote to the development, planning and integration of a mission before it is executed. The passion and attention to detail of the flight control team members, who are always ready to step up when things do not go well, is a hallmark of NASA human spaceflight operations. With tremendous support from the ISS program office and engineering community, the flight control team has made the International Space Station and the programs before it a success.
