This map shows the oldest light in our universe, as detected with the greatest precision yet by the Planck mission. The ancient light, called the cosmic microwave background, was imprinted on the sky when the universe was 370,000 years old. It shows tiny temperature fluctuations that correspond to regions of slightly different densities.

The earliest known maps are of the stars, not the earth. Dots dating to 14,500 BC found on the walls of the Lascaux caves map out part of the night sky, including the three bright stars Vega, Deneb, and Altair (the Summer Triangle asterism), as well as the Pleiades star cluster. The Cuevas de El Castillo in Spain contain a dot map of the Corona Borealis constellation dating from 12,000 BC.

The traditional map of the world, known as the Mercator map, may be the most often seen image of our planet but it is also considered highly inaccurate because Antarctica and Greenland are greatly ...

The REAL world map that shows how big ... - Daily Mail Online

A Babylonian world map, known as the Imago Mundi, is commonly dated to the 6th century BCE. The map as reconstructed by Eckhard Unger shows Babylon on the Euphrates, surrounded by a circular landmass including Assyria, Urartu and several cities, in turn surrounded by a "bitter river" (), with eight outlying regions (nagu) arranged around it in the shape of triangles, so as to form a star.

A Map of Known Pulsars

The Gough Map is important due to its break with previous theologically based mapping. Apart from the Tabula Peutingeriana, its depiction of routes and marked distances is unique in British maps before the 17th century. And compared to previously known maps, like Ptolemy's Geography, it greatly improves the detail on the coast of England and Wales, although its depiction of the then autonomous ...
