A textbook is an organized body of material useful for the formal study of a subject area. A good textbook is distinguished by the following pedagogical features: A discrete, well-bounded scope: all the material should relate to a solid understanding of the subject, usually mixing theory and practice for each topic as it covers the subject domain.

In my field, human anatomy and physiology (A&P), like many others, it is customary to end each textbook chapter with a concept review and self-testing exercises. For the first five editions of my Anatomy & Physiology–The Unity of Form and Function , I titled my end-of-chapter feature “Chapter Review” and its first section, “Review of Key Concepts.”

One common method is to introduce new notions or concepts from concrete experience and problems. In doing so the teacher hopes to connect the abstract notions to concrete images and representations. Although sensible, this approach forgets a duality common to every mathematical notion; what Régine Douady calls the “tool-object dialectic” (R. Douady, 1984).
