They were worlds apart, yet somehow became inseparable.In Fulfillment - Alexis and Bryce are finally happy, in love, and expecting their first child together. But nothing is ever as it seems. One person does not share in their happiness and wants Alexis gone for good. One person can destroy everything.

Sometimes being happily married and completely content is not at all what it seems. After being a stay-at-home mum for the past nine years, Alexis now realises a complete career change is just what she needs.

Decades of research have demonstrated that normal aging is accompanied by cognitive change. Much of this change has been conceptualized as a decline in function. However, age-related changes are not universal, and decrements in older adult performance may be moderated by experience, genetics, and environmental factors. Cognitive aging research to date has also largely emphasized biological changes in the brain, with less evaluation of the range of external contributors to behavioral manifestations of age-related decrements in performance. This handbook provides a comprehensive overview of cutting-edge cognitive aging research through the lens of a life course perspective that takes into account both behavioral and neural changes. Focusing on the fundamental principles that characterize a life course approach - genetics, early life experiences, motivation, emotion, social contexts, and lifestyle interventions - this handbook is an essential resource for researchers in cognition, aging, and gerontology.

Our bond was unbreakable; our love was ever after.I fell in love with Connor Bourke when I was twelve years old.We shared everything together:our first kiss,first love,first mistake,and first regret.I gave him my heart, but he broke it.Now he's back-music's hottest new thing.And he wants me by his side.Eloise Mitchell was a blazing fire when my world turned dark. She'd shined so bright and burned so fierce that the wall I'd built around myself simply melted to the ground at her feet.She showed me that music was my gift, and to use it to speak.She was my voice,my one true love,my everything.Elise's heart belonged to me.And even though I broke it, I was sure as hell gonna fix it.

Humans are remarkably resilient in the face of crises, traumas, disabilities, attachment losses and ongoing adversities. To date, most research in the field of traumatic stress has focused on neurobiological, psychological and social factors associated with trauma-related psychopathology and deficits in psychosocial functioning. Far less is known about resilience to stress and healthy adaptation to stress and trauma. This book brings together experts from a broad array of scientific fields whose research has focused on adaptive responses to stress. Each of the five sections in the book examines the relevant concepts, spanning from factors that contribute to and promote resilience, to populations and societal systems in which resilience is employed, to specific applications and contexts of resilience and interventions designed to better enhance resilience. This will be suitable for clinicians and researchers who are interested in resilience across the lifespan and in response to a wide variety of stressors.

Louisiana, 1815 Thérèse Bondurant trusted her parents to provide for her and her young half-sister, though they never wed due to laws against mixed-race marriage. But when both die of a fever, Thérèse learns her only inheritance is debt—and her father's promise that somewhere on his plantation lies a buried treasure. To save her own life—as well as that of her sister—she'll need to find it before her white cousins take possession of the land. British officer Henry Farlow, dazed from a wound received in battle outside New Orleans, stumbles onto Thérèse's property out of necessity. But he stays because he's become captivated by her intelligence and beauty. It's thanks to Thérèse's tender care that he regains his strength just in time to fend off her cousin, inadvertently killing the would-be rapist in the process. Though he risks being labeled a deserter, it's much more than a sense of duty that compels Henry to see the sisters to safety—far away from the scene of the crime. And Thérèse realizes she has come to rely on Henry for so much more than protection. On their journey to freedom in England, they must navigate a territory that's just as foreign to them both—love. 90,000 words
