~~Automated Testing Solutions 1921 Mounds Ave Saint Paul, MN ...~~

It's these kinds of repetitive tests that lend themselves to test automation. Test automation is the practice of running tests automatically, managing test data, and utilizing results to improve software quality. It's primarily a quality assurance measure, but its activities involve the commitment of the entire software production team.

~~What Is Test Automation? A Simple, Clear Introduction~~

A robust automated testing solution is a software package that runs on the same PC as the application being testing, for example the LIS. Think of it as an invisible robot that sits at the PC and emulates a human being's actions in the application.
