BTW, Cat flash codes are fairly consistent across any engine from the PEEC right up until they stopped using flash codes. Each engine had it's own set of fault codes that it uses (none of them use them all), but engines that have the same flash code have the same fault description for that code. For example, flash code 24 is an oil pressure ...

I had a code 95 and replaced the oil sensor on the top of the motor next to the front valve cover. Now I'm noticing that the warm-up control solenoid just in front of the sensor (sticking laterally out of the engine) is clicking (cycling) when I turn the key to the 'on' position. It cycles for about 20 seconds or so regularly about every second.
