Defining the value of an entire company can be challenging, especially for large, highly competitive business markets. While the main goal for many companies is to increase their market value, understanding the advanced techniques and determining the best course of action to maximize profits can puzzle both academic and business professionals alike. *Valuation Challenges and Solutions in Contemporary Businesses* provides emerging research exploring theoretical and practical aspects of income-based, market-based, and asset-based valuation approaches and applications within the financial sciences. Featuring coverage on a broad range of topics such as growth rate, diverse business, and market value, this book is ideally designed for financial officers, business professionals, company managers, CEOs, corporate professionals, academicians, researchers, and students seeking current research on the challenging aspects of firm valuation and an assortment of possible solution-driven concepts.

This textbook for students of financial management and health care administration focuses on the mechanics of financial analysis and the process of informed decision-making. It outlines the common forms of ownership in the industry, reimbursement methods, legal and regulatory issues, revenue sources, financial functions within an organization, direct and indirect costs, and debt and equity financing.
