Canon's exclusive AIM (Advanced Integrated Multi-Point control) system integrates Area AF and all six metering modes available with the EOS-1V. Focus on a subject within the Area AF ellipse, and the EOS-1V will meter that area for the optimum result where it's needed most.

Canon U.S.A., Inc. | EOS-1v

This camera is designed for serious shooters, not for feature hounds. The EOS-1V gets the job done fast, letting the pro get on to his next paying gig. The EOS-1V is a solid, professional camera made mostly of metal. The EOS 1V is a ruggedized, solid-magnesium-alloy version of the mostly plastic EOS-3, without the EOS 3's mind-controlled autofocus. With this EOS-1V, you have to select your AF zone with the dials, not by just thinking about your subject.

Eos 1v Focus - bitofnews.com

The EOS-1V, successor to the EOS-1N, is a premier-class professional SLR featuring the latest state-of-the-art technology. Premier AF Performance: The 45-point area AF gives predictive AI servo AF at about 9 fps (with the PB-E2 attached) for outstanding subject tracking and blazingly fast focusing, all automatically.

EOS-1V - Canon Camera Museum

Available for EOS-1 series models (and EOS 3) only. Laser matte (with or without grid lines) A laser matte focusing screen such as the Ec-D has no visual focusing aids. Instead, it shows the entire image area going in and out of focus, even with lenses that have an effective aperture smaller than f/5.6.

Canon Knowledge Base - QuickGuide to EOS Focusing Screens

The Canon EOS-1V is a 35mm single-lens reflex camera from Canon's EOS series, released in 2000. The body design formed the basis for Canon's subsequent Canon EOS-1D and EOS-1Ds families of digital SLRs. The 1V was the last model of Canon professional film cameras before it was discontinued on May 30, 2018.

Canon EOS-1V - Wikipedia

As for precision, the EOS-1V is capable of heightened focusing accuracy thanks to a newly developed predictive algorithm. Amazing continuous shooting performance that can capture ten images in a single second. The EOS-1V features the world's fastest continuous shooting speed, enabling film transport at an astounding rate of 10 fps.

The EOS-1v offers a host of features that professional photographers demand, including variable diopter control, 100 percent viewfinder coverage, and an eye-piece shutter. Other critical features include one-touch depth of field preview, mirror lock, a PC socket for studio strobes, and a remote control socket.

Canon EOS-1V 35mm SLR Camera Body, USA 2043A005 - Adorama

The Canon EOS 1V is the original version that is most commonly used. In contrast, the Canon EOS 1V HS is the second version that is larger in dimensions with vertical controls on the body. These cameras have identical functions, which means that anyone can modify the Canon EOS 1V to Canon EOS 1V HS by only changing the grip.

Viewfinder / Auto-Focus. The EOS-1D's viewfinder is similar to that found on the EOS-1V except for: additional status information, differently positioned dioptre adjustment (on the 1V the eyepiece must be removed to adjust), eyepiece now protrudes 20 mm (0.8 in) from the rear of the camera (this helps to keep your nose away from the LCD screen) and that the actual view of the focus screen is cropped to match the sensor's smaller proportions.

Canon Ec-L Focusing Screen 4726A001 - Adorama

The EOS-1N is a 35mm single lens reflex camera body produced by Canon. It was announced by Canon in 1994, and was the professional model in the range, superseding the original EOS-1. The camera was itself superseded by the EOS-1v in 2000. The original EOS-1 had been launched in 1989, two years after the company had introduced their new EOS autofocus system. It was the company's first professional-level EOS camera and was aimed at the same photographers who had used Canon's highly regarded, manua

The forty-five-point wide area auto focus auto focus may be activated by eye controlled focus (ECF), automatic selection (1990s fuzzy logic) or manually dialed in. Only active sensors are visible during AF as a red flash.

Canon EOS 3 Review | End of the Film Era | Canon film camera

With the EOS R, you get a flip screen, lighter weight, a cleaner aesthetic but there is no real reason to jump from the Canon 5D Mark IV to the EOS R because it was mainly a vehicle to give us access to the RF lineup of lenses, including my favorite Canon RF 28-70mm F/2. The EOS R wasn't designed to be the camera that takes over the market.
