Create laws and restrictions. You can create a constitution or write laws for your micronation. For example, you can choose to ban certain items in your country, extract fees for entering your nation, or have your citizens pay taxes. Micronations are free to create whatever laws or restrictions they wish!

Create your own custom city with building instructions for over 50 builds from 8 amazing LEGO Micro Cities! Build a beautiful LEGO® city that's small enough to hold in your hands! Filled with striking photos, step-by-step instructions, and countless ideas for customization, LEGO Micro Cities shows you how building small can open up new possibilities for the creative builder. You'll learn everything you need to know to create your own micro city, from building the foundation to adding convincing architectural details that will bring your city to life.

Learn How To Make Micro Macramé jewelry Learn how you can start making Micro Macramé jewelry quickly and easily! This illustrated guide teaches you step by step how to start making Micro Macramé Jewelry from beginning to end. This book has been written for the person with little-to-no knotting experience. Beginning with the basics, you will learn how to create the necessary padded work surface, you'll learn each of the basic knots and then move on to 5 fun projects. Learn How To Make Micro Macramé Jewelry, opens with a straightforward bracelet allowing you to familiarize yourself with the feel of the cord, giving you time to practice tension as you tie the most commonly used knot in micro-macramé. As you progress you will be introduced to a new knot or two, which then culminates in a final project which uses several knots. What you will find in this guide: Step-by-step instructions with full color photos that guide you through each pattern 5 beautiful, elegant projects that will help you learn how to micro-macramé Tips and tricks to make your experience with micro-macramé more enjoyable A guide showing you exactly how to create your own micro-macramé project board For beginners and anyone who loves jewelry and beading Micro Macramé is the skillful use of several knotting styles that create intricate details and blends in delicate beading which results in unique pieces that are nothing like the macramé of the past. With just a little practice and a few knots, you too can experience the freedom and joy of producing your own unique and versatile pieces. Once you understand the basics, you can continue on into a wide world of possibilities. Before you know it you'll have your friends and family begging you to make them one as well. By the end of this guide, you will have the confidence and understanding needed to create your own beautiful designs. About The Author: Kelsy Eason Kelsy has a unique style that focuses on the knotting and not as much the beading aspect of jewelry design. That's what drew her to micro-macrame. With more than 15 unique patterns on her website and now a book helping beginners get started in the craft, she's one of just a few designers that are helping to spread the word about this wonderful new jewelry technique.

Enjoy these 40 expertly crafted micro-RPGs that are fast, fun, easy to learn, and come in a variety of genres—from space exploration to jungle dungeon crawlers—everything you need to pick up and play today. Get gaming fast with The Ultimate Micro-RPG Book including brand-new micro-RPGs created by experts across the gaming world. From space exploration to jungle dungeon crawlers this book has everything you need to pick up and play today. With these quick-start games, you can create your own adventures, alone or with friends, without any prep, and with minimal set up and pieces. Whether you're new to RPGs or working towards your level 20 mage, this collection is a great way to try out different games and systems, and test your roleplay skills on different character types and situations.

When a man needs only two hundred pounds to marry his cook and buy a public house, one would expect his life to be trouble free, but the fifth Earl of Shortlands has to reckon with his haughty daughter, Lady Adela, and Mervyn Spink, his butler, who also happens to be his rival in love. Mike Cardinal offers to sort out the problem by pretending to be Stanwood Cobbold but his way is blocked by Spink and reformed burglar, Augustus Robb.

Confused? Let P.G.Wodehouse untangle the complications in this light-hearted comedy which ends happily - for almost everyone.

An up to date look at macrame techniques which offers crafters and jewellery makers fresh, inspirational ideas and takes an exciting look at a traditional craft.

This book is essential reading for those interested in understanding current trends of research in the area of biomechanics at micro- and nanoscale levels. It details the research carried out to date in this field by fourteen prominent researchers as part of a four-year government supported project which commenced in 2003. It consists of four chapters entitled Cell Mechanics, Cell Response to Mechanical Stimulation, Tissue Engineering and Computational Biomechanics. Contents:Cell Mechanics:Imaging and Mechanical Properties of Guinea Pig Outer Hair Cells Studied by Atomic Force Microscopy (H Wada et al.)Development of a Novel Micro Tensile Tester for Single Isolated Cells and Its Application to Viscoelastic Analysis of Aortic Smooth Muscle Cells (T Matsumoto et al.)Shear Dependent Albumin Uptake in Cultured Endothelial Cells (K Tanishita et al.)Biomechanical and Biotribological Importance of Surface and Surface Zone in Articular Cartilage (T Murakami et al.)Cell Response to Mechanical Stimulation: Osteoblasts Mechanosensitivity to Localized Mechanical Stimulus Depends on Orientation of Cytoskeletal Actin Fibers (T Adachi & K Sato)Microbiomechanical Properties of Cultured Endothelial Cells Estimated by Atomic Force Microscopy (M Sato)Effects of Mechanical Stresses on the Migrating Behavior of Endothelial Cells (T Tanaka et al.)Tissue Engineering:Engineering Approaches to Regulate Cell Differentiation and Tissue Regeneration (T Ushida et al.)A New Theory on the Localization of Vascular Diseases (T Karino et al.)Automorphogenesis of Load Bearing Fibrous Tissues: Generation of Tensile Stress, Cell Alignment, and Matrix Deformation by Fibroblasts (K Takakuda)Computational Biomechanics:Note on Anisotropic Properties of Cancellous Bone and Trabeculae: Elasticity and Hardness (M Tanaka et al.)Application of Computational Biomechanics to Clinical Cardiovascular Medicine (T Yamaguchi)Biomechanical Study for Skeletal Muscle Injury and a View of Micro-Biomechanics for Microstructure of Muscle (S Yamamoto & E Tanaka)Mechanical Behavior and Structural Changes of Cells Subjected to Mechanical Stimuli: Deformation, Freezing, and Shock Waves (H Yamada et al.) Readership: Engineers, physiologists, biologists and medical doctors interested in biomechanics; graduate students. Keywords:Bioengineering;Biomedical Engineering;Biomechanics;Micro & Nanoscale;Cells;Mechanical Stimulation;Tissue Engineering;ComputationKey Features:First in a series of volumes on the most current research into biomechanics at micro- and nanoscale levelsA comprehensive review on the trend and level of research in this area in Japan

The miniaturization of industrial products is a global trend. Metal forming technology is not only suitable for mass production and excellent in productivity and cost reduction, but it is also a key processing method that is essential for products that utilize advantage of the mechanical and functional properties of metals. However, it is not easy to realize the processing even if the conventional metal forming technology is directly scaled down. This is because the characteristics of materials, processing methods, die and tools, etc., vary greatly with miniaturization. In metal micro forming technology, the size effect of major issues for micro forming have also been clarified academically. New processing methods for metal micro forming have also been developed by introducing new special processing techniques, and it is a new wave of innovation toward high precision, high degree of processing, and high flexibility. To date, several special issues and books have been published on micro-forming technology. This book contains 11 of the latest research results on metal micro forming technology. The editor believes that it will be very useful for understanding the state-of-the-art of metal micro forming technology and for understanding future trends.

Micro health insurance is an emerging concept to reduce poverty and social exclusion and improve health care access. The Handbook of Micro Health Insurance in Africa gives an overview of the challenges and needs in the field of micro health insurance. Focusing on Sub-Saharan Africa, where universal social health protection still has a way to go, the Handbook provides an introduction to the relatively new and promising approach of micro insurance as a risk management tool for low-income households, between the market, self-help, and the state. This book is an output of the project Pro MHI Africa, which is funded by the European Union and directed by the University of Cologne in cooperation with the University of Botswana, the University of Ghana, and the University of Malawi. (Series: Social Protection in Health. Challenges, Needs and Solutions in International Health Care Financing - Vol. 1)

This book provides new insights into the significant gap that currently exists between desired and actual fertility in Europe. It examines how people make decisions about having children and demonstrates how the macro-level environment affects micro-level decision-making. Written by an international team of leading demographers and psychologists, the book presents the theoretical and methodological developments of a three-year, European Commission-funded project named REPRO (Reproductive Decision-Making in a Macro-Micro Perspective). It also provides an overview of the research conducted by REPRO researchers both during and after the project. The book examines fertility intentions from quantitative and qualitative perspectives, demonstrates how the macro-level environment affects micro-level decision-making, and offers a multi-level analysis of fertility-related norms across Europe. Overall, this book offers insight into how people make decisions to have children, when they are most likely to act on their decisions, and how different social and policy settings affect their decisions and actions. It will appeal to researchers, graduate students, and policy advisors with an interest in fertility, demography, and life-course decision making.
