A wide variety of professionals find themselves intimately involved in the criminal justice system; firefighters, emergency medical providers, nurses, physicians, public health personnel, environmental professionals, public works personnel, and many others. No previous work has attempted to address the criminal justice system in terms relevant to these professionals. Interface: A Guide for Professionals Supporting the Criminal Justice System explains the system, provides the reader with guidance to documenting incidents so that the data is both of value to the professional in the future and for use by the other components of the system. Further, this volume presents evidence from the aspect of these professionals, their needs in handling evidence, and basics of collection and preservation for those instances where it falls to them to do so. Professionals, not familiar with safety issues outside of their fields of expertise, have been injured or died as a result of exposure to hazards; it also educates them to considerations for their safety when out of their area of comfort. In addition, this book considers the role of the professional as interviewer, and provides basic guidance to this often valuable skill. Finally, Interface attempts to make the professional knowledgeable and comfortable in the courts, especially on the stand, where the professional may appear as a witness or even as an expert.

Sensing the World, discusses the different senses of the human body and how they function together to make the body respond to outside stimuli. Additionally, this title features a table of contents, glossary, index, color photographs and illustrations, sidebars, pronunciation guidelines, and recommended books and websites for further exploration. Through diagrams and labeled pictures supplementing the text, this title is perfect for reports or lessons.

Developed and implemented by the United States Department of Homeland Security, the National Incident Management System (NIMS) outlines a comprehensive national approach to emergency management. It enables federal, state, and local government entities along with private sector organizations to respond to emergency incidents together in order reduce the loss of life and property and environmental harm.

Decision-Making in Emergency Management examines decisions the authors have made over their careers based on their combined training, experience and instinct. Through a broad range of case studies, readers discover how experience impacts decision-making in conjunction with research and tools available. While the use of science, data and industry standards are always the best option when it comes to handling emergency situations, not all emergency situations fit one known solution. This book comprehensively explores the question "Is 'instinct' a viable factor when faced with a challenging situation and how close does it match up with the best science available?" Includes case studies from natural and manmade disasters, providing readers with decision-making skills in various global settings Provides readers the opportunity to learn from someone else's decisions Inspires emergency response personnel to continuously pursue learning, question their strategies and apply changes as appropriate
