c. Optimal solution is $x_1 = 0, x_2 = 5 \ln 4$. Any positive value for x_1 reduces y . d. If $k = 20$, optimal solution is $x_1 = 15, x_2 = 5$.

Because x_2 provides a diminishing marginal increment to y whereas x_1 does not, all optimal solutions require that, once

Examine microeconomic theory as a way of looking at the world as MICROECONOMICS: AN INTUITIVE APPROACH WITH CALCULUS, 2E builds on the basic economic

foundation of individual behavior. Each chapter contains two sections. The A sections introduce concepts using intuition, conversational writing, everyday examples, and graphs with a focus on mathematical counterparts. The B sections then cover the same concepts with precise, accessible mathematical analyses that assume one semester of single-variable calculus. The book offers flexible topical coverage with four distinct paths: a non-game theory path through microeconomics, a path emphasizing game theory, a path emphasizing policy issues, or a path focused on business. Readers can use B sections to explore topics in greater depth. This second edition continues to present all the standard topics in microeconomics, with calculus, concisely, clearly and with a sense of humor.

This student-friendly text clearly integrates microeconomic theory with calculus and graphics; its approach centers on constructing and analyzing fundamental models. By integrating basic tools of calculus, the text encourages students to solve problems by generating actual numerical solutions. The manner in which calculus reinforces the graphical analysis is clearly demonstrated in a step-by-step fashion; students will understand what the graphical solutions actually represent. Numerous real world applications of the

theory are highlighted throughout the text.

This best-selling text is still the most modern presentation of the subject. The Varian approach gives students tools they can use on exams, in the rest of their classes, and in their careers after graduation.

Included within each chapter of the study guide: Learning Objectives, Walking Tour Summaries, which are chapter outlines requiring fill-in answers, Multiple Choice questions, and Running Glossary fill-in questions. Answers are included for all questions.
