[PDF] Principles Of Transaction Processing | Download Full ...

Description. Transaction processing is designed to maintain a system's Integrity (typically a database or some modern filesystems) in a known, consistent state, by ensuring that interdependent operations on the system are either all completed successfully or all canceled successfully.. For example, consider a typical banking transaction that involves moving \$700 from a customer's savings ...

A second property of transactions is consistency — a transaction program should maintain the consistency of the

Online Library Principles Of Transaction Processing Second Edition The Morgan Kaufmann Series In Database Management Systems

database. That is, if you execute the transaction all by itself on a database that's initially consistent, then

CHAPTER Introduction 1

Philip A. Bernstein, Eric Newcomer, in Principles of Transaction Processing (Second Edition), 2009 3.2 Application Architecture There are three interrelated ways to decompose a TP system: by functional components, by hardware subsystems, and by operating system processes. The decomposition by functional components is shown in Figure 3.1.
