SAP BusinessObjects Web Intelligence User's Guide
Like most data warehouses, BW is a combination of databases and database management tools that are used to support management decision making. SAP BW is a comprehensive business intelligence product centered around a data warehouse and optimized for SAP's R/3 environment. SAP BW also includes preconfigured data extractors, analysis and report tools and business process models.

SAP BW training tutorial - SearchSAP
Hi - I'm new to SAP BW development. I'm looking for user guides which will help to understand the Info cubes, DSO, creating a BEx query in Query designer, step by step instructions etc. I went through SAP help forum but not sure where to start and which guide to download. Appreciate your help. Thanks. Suresh

SAP BW development user guide links - SAP Q&A
The BW Modeling tools provide you with the BW Modeling perspective, with predefined views and configuration. This perspective provides you with the tools and functions required for modeling tasks. You organize your tasks in projects. The following sections provide information about the basic concepts and tasks in the BW Modeling perspective, with special focus on organizing and structuring work in projects, and the general functions for working with BW metadata objects.
