This book examines the history of creative applications of photovoltaic (PV) solar power, including sound art, wearable technology, public art, industrial design, digital media, building integrated design, and many others. The growth in artists and designers incorporating solar power into their work reflects broader social, economic, and political events. As the cost of PV cells has come down, they have become more accessible and have found their way into a growing range of design applications and artistic practices. As climate change continues to transform our environment and becomes a greater public concern, the importance of integrating sustainable energy technologies into our culture grows as well. The book will be of interest to scholars working in art history, design history, design studies, environmental studies, environmental humanities, and sustainable energy design.

The world's fascination with Bond is unstoppable. James Bond is the greatest British fictional hero of the post-war era. He also has a huge following in the US - and around the world - as a legendary Cold War warrior, and now as a daredevil able to take on the villains of the post-Cold War world. The Bond books are all in print. Today, Sebastian Faulks is writing new stories while Charlie Higson is writing children's versions. In this comprehensive guide to Ian Fleming, the books, the films and the world that was created out of 007, Nigel Cawthorne uncovers Bond's allure. It comes with special sections on the main characters - Q, M, the Bond Girls, and the women who first inspired them; the cars, and the incomparable baddies. It will be the ideal gift for fans and aficionados alike and will be published to coincide with the 50th anniversary of DOCTOR NO; the new film is scheduled for autumn 2012.
