From agriculture to big business, from medicine to politics, The Cigarette Century is the definitive account of how smoking came to be so deeply implicated in our culture, science, policy, and law. No product has been so heavily promoted or has become so deeply entrenched in American consciousness. The Cigarette Century shows in striking detail how one ephemeral (and largely useless) product came to play such a dominant role in so many aspects of our lives—and deaths.

The story of tobacco's fortunes seems simple:

science triumphed over addiction and profit. Yet the reality is more complicated—and more political. Historically it was not just bad habits but also the state that lifted the tobacco industry. What brought about change was not medical advice but organized pressure: a movement for nonsmoker's rights.

The American military-industrial complex and accompanying culture are most often associated with massive weapons procurement programs and advanced technologies. However, one aspect of the complex is not a weapon or even a machine,

but one of the world's most highly engineered consumer products: the manufactured cigarette. *Smoke 'Em If You Got 'Em* describes the origins of the often comfortable, yet increasingly controversial relationship among the military, the cigarette industry, and tobacco and politicians during the twentieth century. *Smoke 'Em If You Got 'Em* is also a study in modern American political economy. Bureaucrats, soldiers, lobbyists, government executives, legislators, litigators, or anti-smoking activists all struggled over far-reaching policy issues

involving the cigarette. The soldier-cigarette relationship established by the Army in World War I and broken apart in the mid-1980s underpinned one of the most prolific social, cultural, economic, and healthcare-related developments in the twentieth century: the rise and proliferation of the American manufactured cigarette smoker and the powerful cigarette enterprise supporting them. Using the manufactured cigarette as a vehicle to explore political economy and interactions between the military and American society, Joel R. Bius helps

the reader understand this important, yet overlooked aspect of twentieth-century America. Allan M Brandt

The cigarette is the deadliest artifact in the history of human civilization. It is also one of the most beguiling, thanks to more than a century of manipulation at the hands of tobacco industry chemists. In *Golden Holocaust*, Robert N. Proctor draws on reams of formerly-secret industry documents to explore how the cigarette came to be the most widely-used drug on the planet, with six trillion sticks sold per year. He paints a

harrowing picture of tobacco manufacturers conspiring to block the recognition of tobacco-cancer hazards, even as they ensnare legions of scientists and politicians in a web of denial. Proctor tells heretofore untold stories of fraud and subterfuge, and he makes the strongest case to date for a simple yet ambitious remedy: a ban on the manufacture and sale of cigarettes.

No book before this one has rendered the story of cigarettes -- mankind's most common self-destructive instrument and its most profitable consumer product -- with such sweep and

enlivening detail. Here for the first time, in a story full of the complexities and contradictions of human nature, all the strands of the historical process -- financial, social, psychological, medical, political, and legal -- are woven together in a riveting narrative. The key characters are the top corporate executives, public health investigators, and antismoking activists who have clashed ever more stridently as Americans debate whether smoking should be closely regulated as a major health menace. We see tobacco spread rapidly from its aboriginal sources

in the New World 500 years ago, as it becomes increasingly viewed by some as sinful and some as alluring, and by government as a windfall source of tax revenue. With the arrival of the cigarette in the late-nineteenth century, smoking changes from a luxury and occasional pastime to an everyday -- to some, indispensable -- habit, aided markedly by the exuberance of the tobacco huskers. This free-enterprise success saga grows shadowed, from the middle of this century, as science begins to understand the cigarette's toxicity. Ironically the more detailed

and persuasive the findings by medical investigators, the more cigarette makers prosper by seeming to modify their product with filters and reduced dosages of tar and nicotine. We see the tobacco manufacturers come under intensifying assault as a rogue industry for knowingly and callously plying their hazardous wares while insisting that the health charges against them (a) remain unproven, and (b) are universally understood, so smokers indulge at their own risk. Among the eye-opening disclosures here: outrageous pseudo-scientific claims made for cigarettes throughout the '30s and

Dealing with an emotional subject that has generated more heat than light, this book is a dispassionate tour de force that examines the nature of the companies' culpability, the complicity of society as a whole, and the shaky moral ground claimed by smokers who are now demanding recompense

Traditional narratives of capitalist change often rely on the myth of the willful entrepreneur from the global North who transforms the economy and delivers modernity—for good or ill—to the rest of the world. With *Cigarettes, Inc.*, Nan Enstad upends this story, revealing the myriad cross-cultural encounters that produced corporate life before World War II. In this startling account of innovation and expansion, Enstad uncovers a corporate network rooted in Jim Crow segregation that stretched between the United States and China and beyond.

Cigarettes, Inc. teems with a global cast—from Egyptian, American, and Chinese entrepreneurs to a multiracial set of farmers, merchants, factory workers, marketers, and even baseball players, jazz musicians, and sex workers. Through their stories, Cigarettes, Inc. accounts for the cigarette's spectacular rise in popularity and in the process offers nothing less than a sweeping reinterpretation of corporate power itself.
