Written by leading scholars in their respective fields, *The Heritage of World Civilizations* offers compelling and thorough coverage of the unique heritage of Asian, African, Middle Eastern, European, and American civilizations, while highlighting the role of the world's great religious and philosophical traditions.

In terms of major events, the 20th century influences nations, regions, and peoples in profound and all-inclusive ways. It was a century of earth-shaking, contradictory events — great evil, genocide, and destruction on massive scales on the one hand, and, at the same time, inventions, discoveries, and political/social improvements which have improved the lives of billions of people. Most of the inventors and scientists, and, in too many cases, the worst tyrants, were Europeans. The pages within guide the reader on this exciting, often bloody, and yet hope-filled journey. Edgar B. Schick, Ph.D. Arthur Drea has written a compelling and readable primer of the utmost intellectual value to history students and the general public alike for a course in European History of the Twentieth Century. He achieves this desired effect with exactitude and concision, which match his course 's focus on just over one hundred years of causation leading to the contemporary state of European society and economy. Indeed, every tributary stream of events of this social, political, and economic type is seamlessly channeled into the main course of Drea 's explanation and analysis with the flawless timing that characterizes narrative history at its best.

The authors have found and strongly believe that a reader is enriched and engaged when he/she view the reading and writing they do as a way of participating. From the beginning, the goal in The Blair Reader has always been to encourage these discussions in the wider world by responding to the ideas of others.
