decides to save a highly intelligent anthropoid ape from the scientists who would sacrifice his life to gain data about his intelligence.

The Woman and the Ape (Book) | The Seattle Public Library ...

The woman is Madelene, rich, beautiful and alcoholic; the ape, intelligent and illegally imported to London by Madelene ' s husband Burden. Burden has plans, so does Madelene, and so, as it happens, does the ape.

The Woman And The Ape | TripFiction

Though "humorous" is not a word usually associated with Peter Hoeg, *The Woman and the Ape*, with its irony and satire, is very, very funny. An ape of unknown primate species escapes smugglers at the docks of London, only to be captured by animal researchers and primatologists, who intend to advance human knowledge--and themselves--through their testing and research on him.

*The Woman and the Ape* is the story of a unique and unforgettable couple—Madelene and Erasmus. Madelene—a sleeping beauty drowsing gently in an alcoholic stupor—is the beautiful and disillusioned wife of Adam Burden, a distinguished behavior scientist. Erasmus—the unlikely prince—is a 300-pound ape.

The Woman and the Ape on Apple Books

*The Woman and the Ape* is the remarkable story of their relationship. Part fable, part romance, and part slapstick comedy, it poses intriguing questions about nature and nurture and builds to a hilarious ending.

*The Woman and the Ape* is the story of a unique and unforgettable couple—Madelene and Erasmus. Madelene—a sleeping beauty drowsing gently in an alcoholic stupor—is the beautiful and disillusioned wife of Adam Burden, a distinguished behavior scientist. Erasmus—the unlikely prince—is a 300-pound ape. Erasmus is brought to the Burdens' London home after escaping from animal smugglers. In him Adam Burden believes he has discovered a hitherto unknown mammal, a highly intelligent anthropoid ape, the closest thing yet to a human being. If he is right, Erasmus will become the jewel of Burden's new zoo. But Madelene decides to save Erasmus, investing in her efforts all the single-mindedness she until now has reserved for drinking. The two fall in love—a love affair as emotionally and erotically charged as any female-male relationship could ever be. But Erasmus has come to England with a purpose, and eventually the couple must face the world they have sought to flee. A fable for our time, *The Woman and the Ape* poses searching questions about the nature of love, freedom, and humanity

Eva ' s hospital room looks out onto the skyscrapers of a huge city, but since waking up from her coma she only dreams of trees Thirteen-year-old Eva opens her eyes to find herself in a hospital, her body paralyzed while it heals from a devastating accident. Her mother says that Eva will be able to move her hands and face soon and that everything is going to be fine, but something in her voice tells Eva it ' s not that simple. The doctors give Eva a keyboard that turns her typing into speech and controls a mirror that rotates to look around the room and out the window—every direction except back at her bed. What are the doctors trying to hide from her? And why, in an overpopulated world where humans have tamed all the wild places, does Eva keep dreaming of a forest she ' s never seen? This ebook features an illustrated personal history of Peter Dickinson including rare images from the author ' s collection.

Perhaps only the animals can tell us what it is to be human The souls of ten animals caught up in human conflicts over the last century and connected to both famous and little-known writers in surprising ways tell

their astonishing stories of life and death. In a trench on the Western Front, a cat recalls her owner Colette's theatrical antics in Paris. In Nazi Germany, a dog seeks enlightenment. A Russian tortoise once owned by the Tolstoys drifts in space during the Cold War. During the Siege of Sarajevo, a starving bear tells a fairy tale. And a dolphin sent to Iraq by the U.S. Navy writes a letter to Sylvia Plath. Exquisitely written, playful, and poignant, Ceridwen Dovey's *Only the Animals* is a remarkable literary achievement by one of our brightest young writers. An animal's-eye-view of humans at our brutal, violent worst and our creative, imaginative best, it asks us to find our way back to empathy not only for animals but for other people, and to believe again in the redemptive power of reading and writing fiction.

These eight stories are linked by a date and a motif. All of them have to do with love. Love and its conditions on the night of March 19, 1929. In his second book and his only collection of stories, Peter H ø eg proves himself to be a true storyteller in the tradition of Karen Blixen and Joseph Conrad. These beautifully constructed tales deal with love, the classic arts and sciences, and the confrontation of Western and non-Western cultures. Moving from a railroad car in the Congo to a sailboat in Lisbon's harbor to an upper-class apartment in Copenhagen, they include the tales of a young, disillusioned mathematician who comes face-to-face with his culture's distortion of Africa; an esteemed judge who runs off with the young man he has just sentenced to prison for his homosexual tendencies; and a town--sealed off from the plague--that is infiltrated by a troupe of traveling actors.

Through a series of vividly imaginative and wildly colorful characters, Hoeg gives us a very different account of the twentieth century, which in Denmark encompasses the transition from a medieval society to a modern welfare state with its accompanying cultural revolutions. Reminiscent of the work of the magical realists but with a distinctive Nordic twist, *The History of Danish Dreams* is a truly magical novel.

In his final novel, the acclaimed novelist spins an apocalyptic tale that recounts the experiences of Calvin Cohn, who, through a divine slip, is the only human being left alive after the apocalypse. Reprint.

Prospects for the 1907 archaeological season in Egypt are looking somewhat dull to Amelia. As a result of Emerson's less-than-diplomatic behaviour, they have been demoted to examining only the most boring tombs in the Valley of the Kings - mere leftovers, really. And then, in a seedy section of Cairo, the younger members of the Peabody Emerson clan purchase a mintcondition papyrus of the famed Book of the Dead, the collection of magical spells and prayers designed to ward off the perils of the underworld and lead the deceased into everlasting life. But for as long as there have been graves, there have also been grave robbers - and so begins a new adventure into antiquity. The season rapidly switches from dull to deadly as Amelia strives to untangle a web woven of criminals and cults, stolen treasures and fallen women - all the while under the unblinking eye of a ruthless, remorseless killer.

Why are humans so fond of water? Why is our skin colour so variable? Why aren't we hairy like our close ape relatives? A savannah scenario of human evolution has been widely accepted primarily due to fossil evidence; and fossils do not offer insight into these questions. Other alternative evolutionary scenarios might, but these models have been rejected. This book explores a controversial idea - that human evolution was intimately associated with watery habitats as much or more than typical savannahs. Written from a medical point of view, the author presents evidence supporting a credible alternative explanation for how humans diverged from our primate ancestors. Anatomical and physiological evidence offer insight into hairlessness, different coloured skin, subcutaneous fat, large brains, a marine-type kidney, a unique heat regulation system and speech. This evidence suggests that humans may well have evolved, not just as savannah mammals, as is generally believed, but with more affinity for aquatic habitats - rivers, streams, lakes and coasts. Key Features: Presents the evidence for a close association between riparian habitats and the origin of humans Reviews the "savannah ape" hypothesis for human origins Describes various anatomical adaptations that are associated with hypotheses of human evolution Explores characteristics from the head and neck such as skull

and sinus structures, the larynx and ear structures and functions Corroborates a novel scenario for the origin of human kind ' ... a counterpoint to the textbooks or other books which deal with human evolution. I think readers will see it as a clearly written, well-supported discussion of an alternative perspective on human origins ' . —Kathlyn Stewart, Canadian Museum of Nature, Ottawa ' There is a pressing need to expand discussions of human evolution to include non-anthropocentric narratives that use comparative data. Dr Rhys-Evans ' specific expertise and experience with the human head, neck, ears, throat, mouth and sinuses, provides him with a distinct perspective from which to approach the subject of human evolution. Moreover, his understanding of non-anthropocentric views of human evolution (water-based models), allow him to apply a biological approach to the subject, missing in more traditional (savannah-based) models ' .  
—Stephen Munro, National Museum of Australia

Details how, with the unprecedented opening of African forests by European and Asian logging companies, the traditional consumption of wild animal meat in Central Africa has suddenly exploded in scope and impact, moving from what was recently a subsistence activity to an enormous and completely unsustainable commercial enterprise. Although the three African great apes account for only about one percent of the commercial bush meat trade, today's rate of slaughter could bring about their extinction in the next few decades. Eating Apes documents the when, where, how, and why of this rapidly accelerating disaster. In bringing the facts of this crisis and these impending extinctions into a single, accessible book, Peterson takes us one step closer to averting one of the most disturbing threats to our closest relatives.--From publisher description.
